Admit to discharge FIM* change	32	31	31	34	31	32

Outcomes obtained from United Data System for Medical Rehabilitation ®. * FIM™ is the functional independence measure used by clinicians to follow the patients functional status. It determines the burden of care.

As the patient progresses the FIM score gets higher demonstrating that the patient is functioning more independently

*** Age includes 1 patient under 18 in 2016.

**Community setting is defined as discharging to home, board and care, retirement or assisted living.
