

Every Woman Counts Program: 2016 Data Snapshot

PROGRAM BACKGROUND

Program Start: 1996 (data included from 2006)

Program Description: John Muir Health provides free breast and cervical cancer screening and diagnostic services through the State of California's Every Woman Counts Program. "One-Stop-Shop" monthly clinics provide comprehensive services at one location on the same day to low income, uninsured women. Patients receive culturally appropriate education on early detection, breast self exam instruction, Clinical Breast Exams, pelvic exams and pap smears by physicians or Nurse Practitioners with expertise in breast cancer, screening and diagnostic mammography, ultrasound and same day ultrasound. Cervical cancer clinics were held 2011-2014 only.

Primary Goal to provide culturally sensitive breast health services and cervical cancer screening to underserved women so that breast cancer can be detected early and cervical cancer can be prevented and/or detected.

High-Level Results

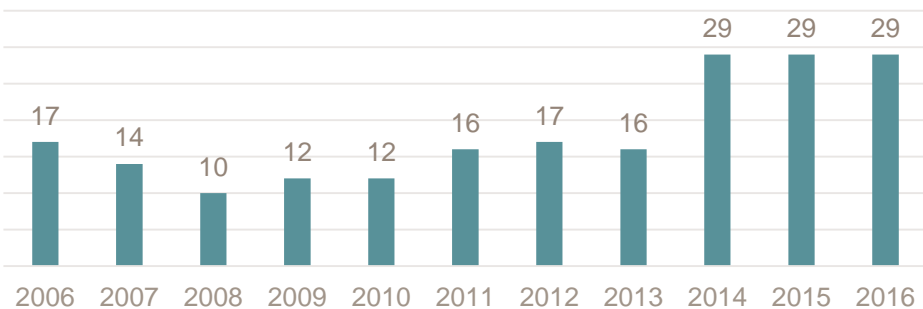

- ❖ To date, Every Woman Counts served a total of **3,842** breast patients and **419** cervical patients.
- ❖ **100%** of patients treated were uninsured.
