Every Woman Counts Program: 2018 Data Snapshot

Program Start: 1996 (data included from 2006)

Program Description: John Muir Health provides free breast and cervical cancer screening and diagnostic services through the State of California’s Every Woman Counts Program. “One-Stop-Shop” monthly clinics provide comprehensive services at one location on the same day to low income, uninsured women. Patients receive culturally appropriate education on early detection, breast self exam instruction, Clinical Breast Exams, pelvic exams and pap smears by physicians or Nurse Practitioners with expertise in breast cancer, screening and diagnostic mammography, ultrasound and same day ultrasound. Cervical cancer clinics were held 2011-2014 only.

Primary Goal to provide culturally sensitive breast health services and cervical cancer screening to underserved women so that breast cancer can be detected early and cervical cancer can be prevented and/or detected.

High-Level Results

- To date, Every Woman Counts served a total of 4,622 breast health patients and 419 cervical cancer screening patients.
- 100% of patients treated were uninsured.

Every Woman Counts Program: 2018 Data Snapshot

Patient Volume

In 2018, Every Woman Counts held a total of 29 Breast Clinics, which served 358 breast cancer screening patients.

Among the 358 patients in 2018, there were a total of 395 clinical encounters for services.

SERVICES AND DIAGNOSES

Services Provided
In 2018, 98% of patients were provided with one-stop, same day breast services to include breast exams, diagnostic mammograms, ultrasounds and biopsies.

Breast Cancer Diagnosis
Since 2006, the program has diagnosed a total of 110 breast cancer cases. A total of 100% of malignant diagnoses were enrolled in the Breast and Cervical Cancer Treatment Program the day they received results.
