

Residency Curriculum

John Muir Health Family Medicine curriculum is designed to impart the tools that cultivate a passion for care of the vulnerable, and the proficiency, inquisitiveness and leadership skills necessary to excel in any practice setting.

We believe in “Clinic First” – placing greatest importance on strong training in the outpatient setting. From the very beginning of your residency you will have the opportunity to build your patient panel within the Family Medicine Clinic. Our Clinic First approach allows you to maintain continuity and build strong relationships with your patients from the very first month. You will be available in the office to care for your patients on a regular basis.

Our patient population is a mix of low income non-English speaking patients and commercially insured patients. Please see the reverse side for our 3 year curriculum.

- During your Family Team Care rotation, you will work in the Family Medicine Clinic five mornings a week.
- While working on the Care of Dependent Adults (CODA) and Vulnerable Population Health rotation, residents will be in the FMC four afternoons a week.
- During the Musculoskeletal/Sports, Women’s Health/Minor Procedures and Obstetric-Newborn rotations, residents will be available in the Family Medicine Clinic one full day per week.
- While on Adult Hospital Medicine and Pediatric Hospital, residents will participate in Family Medicine Clinic one morning per week.

Please see the reverse side for our 3 year curriculum.

John Muir Health Family Medicine Residency Curriculum

There may be some minor adjustments as we finalize the second and third year curriculum.
