

Obstetrics and Gynecology (OB/GYN) at Berkeley Outpatient Center

Overview

We offer comprehensive obstetric and gynecologic care for conditions related to pregnancy and childbirth—as well as diseases and disorders affecting the female reproductive system. With access to the latest advances in care, research and technology, our John Muir Health and UCSF Health OB/GYNs provide exceptional care for women for a wide range of conditions, from the routine to the highly complex, throughout every stage of their life.

Services offered:

- Advanced laparoscopic surgery
- LGBTQIA+ hormone therapy and gender-affirming surgery
- Care for women with disabilities and cancer
- Obstetrics and gynecology
- Adolescent and pediatric gynecology
- Comprehensive family planning

Conditions treated:

- Cervical dysplasia
- Chronic pelvic pain
- Pelvic organ prolapse
- Fibroids
- Abnormal uterine bleeding
- Intrauterine scarring (Asherman's syndrome)
- Menopause
- Ovarian cysts and pathology

Additional on-site services:

- Specialty care (15+ specialties)
- Lab and imaging services
- Care coordination for chronic conditions
- Primary and urgent care
- Classes, health screenings and senior services
- Free, validated onsite parking

How to refer patients:

For more information or to refer a patient, please call [\(510\) 985-5200](tel:5109855200).
